etc., and the most inviting field in Ken-
tucky for investment of capital and pluck.

VOL. XV, NO. 25.

GREENVILLE, KY., THURSDAY, JULY 31, 1913.

50c. PER YEAR, IN ADVANCE

KENTUCKIANS' HOME-COMING

ONE MILLION FORMER RES-
IDENTS INVITED TO ATTEND
GREAT CELEBRATION.

RAILROADS OFFER LOW RATES

Perry's Victory on Lake Erie, Battle
of Thames and Massacre of River
Raid to Be Reproduced in Fire-
works and Sham Battles.

One million expatriated Kentuck-
ians and their children, even to the
fourth and fifth generations, have
been invited to return to Louisville to
participate in the Perry's Victory Cen-
tennial Celebration, to be held in that
city seven days, beginning September
29. Those particularly invited are the
descendants of Kentucky soldiers and
sailors of the War of 1812, and it is
estimated that 75 per cent of native-
born Kentuckians and the descendants
of those born in Kentucky in the past
century are eligible to participate in
such a celebration. Approximately one
million people now living in other
states are included in the "list of those
invited."

The purpose of the Louisville cele-
bration is to commemorate not only
Perry's victory on Lake Erie, but all
other events of the war of 1812. How-
ever, in particular honor of Commo-

GOVERNOR ISAAC SHELBY, OF
KENTUCKY

Who in person led the victorious forces
in the Battle of the Thames.

dore Perry a special attraction in the
Louisville celebration will be the re-
union of the Perry family, regardless
of kinship. Everybody by the name
of "Perry" will be invited to this spe-
cial entertainment and those who ex-
pect to attend are requested to notify
Edwin Perry at the Louisville head-
quarters.

The Kentucky Association, which
has in charge the Louisville celebra-
tion, has given an order for a quarter
of a million ancestry certificates to be
handsomely engraved, and which will
be filled in and given away as souve-
nirs to descendants of Kentucky sol-
diers and sailors of the War of 1812.
Another entertainment in their hon-
or will be a mammoth reception, at
which refreshments will be served and
opportunity provided for public ad-
dresses. For the few remaining actual
sons and daughters a banquet will be
given. A great hall will be given in
the First Regiment Armory, which has
a capacity of 20,000 for them.

Forty per cent of the white male
population of Kentucky engaged in the
War of 1812, consequently forty per
cent of the succeeding generation were
really sons and daughters of that war,
and, estimating that one-half of them
intermarried with families which did
not participate in the war, sixty per
cent of the third generation were
grandchildren of the war, and in sim-
ilar manner at least seventy-five per
cent and probably as high as ninety
per cent of the fourth and incoming
fifth generations are descendants of
Kentuckians who fought in that war.

It is estimated that in the state of
Kentucky alone one million men, wom-
en and children are eligible to partic-
ipate in the proposed reunion, and it
is estimated that another million now
living outside of Kentucky are eligible
to participate.

During the week of the celebration
in Louisville spectacular free events,
including features on a mammoth
scale not heretofore given with any
American celebration, will be provided
every afternoon and evening. Pilgrim-
ages to notable historic scenes of in-
terest may be made in the mornings.

In addition to these attractions there
will be scores of the highest priced
amusement concessions that can be se-
cured on the American continent.

CARE OF THE CONSUMPTIVE

NOT DANGEROUS IN THE HOME
IN THE EARLY STAGES
OF THE DISEASE.

Important Information Regarding the
Proper Care of the Patient—The
Use of Material Eating Utensils—
Care of the Clothes.

The home care of the consumptive
in the beginning stage, under the su-
pervision of a doctor or a nurse, is not
dangerous to the other members of
the household. The germs of the dis-
ease are almost wholly thrown off in
the discharges from the mouth and
nose, and a uniformly careful collec-
tion and destruction of this material
will prevent the spread of the germs
through the house. The consumptive
should spit in a paper box or cloth
which can be burned. Paper napkins
should be used instead of the ordinary
cotton or linen handkerchiefs to wipe
the nose and lips, and these napkins
should be carefully burned. The con-
sumptive should have his own set of
dishes, which should be washed sep-
arately in boiling water. His bed and
table linen should first be soaked in a
disinfecting solution or boiled for half
an hour before being washed with the
rest of the family laundry. He should
wash his hands carefully before and
after eating. He should never cough
without a paper napkin held to his
mouth. He should never kiss another
person. These are practically all of
the precautions; but they are really so
difficult to observe day in and day
out that special sanatoria for the care
of consumptives are almost essential.
Kentucky Tuberculosis Commission.

ASHAMED!

Lots of people seem proud to have ap-
pendicitis or nervous troubles because
they think they are fashionable dis-
eases, and are ashamed to be called
consumptives because consumption is
not fashionable. Feeling this way, they
neglect diagnosis and medical
care when they first detect the signs
of consumption, thinking that, by sim-
ple neglect, it will all disappear.
The truth is that 5,000 lives are sacri-
ficed annually in the United States
through this false pride. The only
thing to be ashamed of in having a
case of tuberculosis in the family is
the neglect of the disease and the con-
sequent death of the sufferer; and
such neglect deserves round censure
because it will probably involve more
than one person. Remember that an
early diagnosis of consumption in-
creases the chance of cure a thousand
fold.

SMALL COUNTY HOSPITALS PROVIDED FOR KENTUCKY

FULTON COUNTY TUBERCULOSIS HOSPITAL, GLOVERSVILLE, N. Y.
This is a remodeled farmhouse. The entire cost, the small farm included,
was about \$9,500. It provides accommodation for 13 incipient cases in
wards and 4 advanced cases in separate rooms.

The law creating the Kentucky Tu-
berculosis Commission at the last leg-
islature provides also a plan for the
building of small hospitals throughout
the state for the proper treatment of
tuberculosis. The plan in brief is as
follows: The Fiscal Court of any
county may declare that county a dis-
trict for the purpose of building a hos-
pital. Or, by petition, the question
may be submitted to a vote of the peo-
ple at any regular election, and, if
carried, it is then the duty of the Fis-
cal Court to declare the county a dis-
trict. Any group of counties touching
one another may declare themselves
a single district for this purpose by a
vote at any general election which
carries in each of the counties in-
volved. Then, under certain restric-
tions in the law, the State Commission
names a considerable group of citi-
zens, men and women, of the county
or counties involved, from which
group the judges of these counties
name a District Board of Tuberculosis
Hospital Trustees. This Board then
asks of the Fiscal Court funds to be
raised in the regular levy of taxes.

From these funds a site is selected,
subject to the approval of the State
Commission, and then the Board pro-
ceeds to erect the hospital. The State
Commission is given a very general
oversight of the future activities of

REST!

If the doctor says "Tuberculosis,"
follow exactly his orders in regard
to ventilation, food, exercise and
rest. He knows better than you do.
This is especially true in regard to
the rest and exercise, which have
to be carefully gauged for each pa-
tient and each stage of the disease.
Until the disease is checked and
marked improvement in general
condition and increased weight are
noticed, almost absolute rest is es-
sential. The disease is one that de-
stroys the tissues of the body and
uses up its energy rapidly. If you
persist in using up your energy by
work and exercise, the body has
nothing left to fight with. Beware
what the family medical books pre-
scribe in the way of exercise for
consumptives. No one prescription
will answer for all cases, and this
may be the one where their gener-
al prescription will send you to the
graveyard. If your responsibility
seems to make absolute rest for
two or three or four months impos-
sible, just remember that the pro-
gress of the disease will soon force
you to it without the hope of re-
covery.
Kentucky Tuberculosis Commission.

DISPENSARIES!

A free dispensary is a place kept
open certain hours of the week with
a doctor and generally a nurse in at-
tendance for the free examination of
those who need his services. People
mean to go to their physicians and
pay the regular fee for such ser-
vice. Inasmuch as physicians always
render their services free to the needy
anyway, they generally favor the dis-
pensary as saving time. Sometimes
these dispensaries, or clinics, are held
for all diseases and sometimes
for special classes of disease, such as
tuberculosis, or hook worm, or dis-
eases of the eye, or nose and throat.
Such a dispensary is an advantage to
the whole community. The newly
less hesitation about going there when
ill than about calling a physician; con-
sequently maladies are often more
quickly diagnosed and put under con-
trol, and the contagious diseases are
then prevented from spreading. Es-
pecially in the case of consumption, it is
easier to get an examination at a
dispensary than at home. The
information which can be better secured
and tabulated in a dispensary than
elsewhere is of great service in any
general campaign for public health.
A free dispensary can be cheaply start-
ed and maintained, because physicians
are always willing to give an hour or
two a week of their time to that work.
Are you ready to give a little of your
money for it in case one is started in
your community?
Kentucky Tuberculosis Commission.

CONDITION FOR BROOD SOW

Animal to Farrow Should Be Neither
Too Fat Nor Too Thin—Plenty
of Exercise Needed.

Keeping the brood sow in proper
condition of flesh is one thing that
the swine breeder should not neglect.
Just what degree of fatness should be
maintained the breeder should de-
cide for himself, because that is
something that cannot be very well
stated on paper.

Some advocate an extreme degree
of thinness, but I think that is scarce-
ly proper, for it is almost certain to
breed into the progeny a characteris-
tic that prevents rapid fattening, says
a writer in the Farm Progress. Then,
when the ration is reduced to such a
quantity that they will produce the
thinness, they are hardly sufficient for
keeping up the vigor of the body.

When sows are kept at the proper
degree of fatness their litters are al-
most certain to be easy fatteners, and

Fit for Market.

then, when a sow has outlived her
years of usefulness as a breeder, she
may be fattened into an animal of
first-class marketable quality.

When a brood sow has once been
overfatted the chances are that her
usefulness as a breeding animal has
been ended. Even though better feed-
ing methods be used thereafter, it will
be impossible to better matters any.

Plenty of exercise is necessary to
assure the proper assimilation and
digestion of the food. The sow should
have access to sufficient area to as-
sure that. By combining a properly
balanced ration with plenty of exer-
cise the animals should keep in proper
condition of flesh and health.

LIVEN CHOLERA TO TYPHOID

Control and Eradication of Disease
Is Matter of Education Rather
Than Vaccination.

(By DR. J. W. CONNORWAY, Veterinar-
ian of Missouri Experiment Station.)
The control and eradication of hog
cholera is a matter of education rather
than vaccination with hog cholera
serum.

Hogs must have pure water. Hog
cholera is like typhoid. The English
call it "pig typhoid." Last Summer,
when it was so dry and the pools
were low and stagnant, the disease
was spread by the great number of
hogs that drank from ponds. The
farmers that gave their hogs well
water had the least cholera on their
farms.

Hogs often become permanent
carriers of the disease germs after they
have been cured, and will spread the
infection. Doctor Connorway also says
that pigs carry the hog cholera
germs from one farm to another.
The buildings where hogs are kept
should be disinfected with alkali-
nated lime. It is cheap and you can see
where you put it. Disinfect the hog
lot also. Where proper sanitary
conditions exist there is little danger of
hog cholera. Hogs should not be fed
in the mud, but on hard ground or on
a brick or concrete floor.

LIVE STOCK NOTES

Have little bedding in the farrowing
box. Get acquainted with the rows before
farrowing time. It pays.

Give the ewes the run of the fields
every good day in the spring.

Don't wait until you need pig
forwards before you get them. Be ready!

Few branches of stock feeding offer
better inducements than feeding range
lambs.

A fender around the sides keeps the
sow from lying out of the pen with
her pigs.

At weaning time colts should be
taken away entirely out of sight of
the mothers.

Not ill-fed, hay fed colts tell the
story of improper feeding, slow growth
and poor development.

Pneumonia kills many pigs before
they get used to sleeping in damp
pens, drafts or snow banks.

The pregnant mare is like the cow
and sow and needs the same consid-
erate care and judicious feeding.

It is expensive carelessness to bitch
a warm horse inadequately protected
from raw winds and drifting rain.

Saved Girl's Life

"I want to tell you what wonderful benefit I have re-
ceived from the use of Thedford's Black-Draught," writes
Mrs. Sylvia Woods, of Clifton Mills, Ky.

"It certainly has no equal for the grippe, bad colds,
liver and stomach troubles. I firmly believe Black-Draught
saved my little girl's life. When she had the measles,
they went in on her, but one good dose of Thedford's
Black-Draught made them break out, and she has had no
more trouble. I shall never be without

THEDFORD'S BLACK-DRAUGHT

in my home." For constipation, indigestion, headache, dizzi-
ness, malaria, chills and fever, biliousness, and all similar
ailments, Thedford's Black-Draught has proved itself a safe,
reliable, gentle and valuable remedy.

If you suffer from any of these complaints, try Black-
Draught. It is a medicine of known merit. Seventy-five
years of splendid success proves its value. Good for
young and old. For sale everywhere. Price 25 cents.

FOR COUNTY COURT CLERK.

We are authorized to announce the candidacy of A. Leo Fentress for clerk of the Muhlenberg County Court, subject to the action of the Democratic party.

We are authorized to announce the candidacy of John N. Taylor for clerk of the Muhlenberg County Court, subject to the action of the Citizens' party.

FOR SHERIFF.

We are authorized to announce the candidacy of Robert Wickliffe for sheriff of Muhlenberg County, subject to the action of the Democratic party.

We are authorized to announce the candidacy of Chas. E. Blackwell for sheriff of Muhlenberg County, subject to the action of the Citizens' party.

FOR SUPERINTENDENT OF SCHOOLS.

We are authorized to announce Miss Amy M. Longest a candidate for superintendent of public instruction, subject to the action of the Democratic party.

FOR JAILER.

We are authorized to announce the candidacy of Chas. W. Stovall for jailer of Muhlenberg County, subject to the action of the Democratic party.

We are authorized to announce the candidacy of Simon P. Miller for jailer of Muhlenberg County, subject to the action of the Citizens' party.

FOR REPRESENTATIVE.

We are authorized to announce the candidacy of Ed Frost for the Legislature to represent Muhlenberg County in the General Assembly of Kentucky, subject to the action of the Democratic party, August 2.

It must be confessed that some of those Bulgarian bathing suits look as though they were spelled with a "V."

With the additional precautions to insure clean bread the life of the fly becomes more and more precarious.

TAKING an average of 27 percent off the tariff rates ought to help some, provided the taking off is wisely done.

MEXICANS need not agitate themselves over the "designs" of this country. We have no desire to annex a cemetery.

BEER kegs of concrete are said to be successful, but the improvement ought to be carried further and stomachs of concrete supplied.

CHRISTMAS is coming. We mention the fact not to induce you to buy them early, but to awaken the hope that congress will ultimately accomplish something.

To make old fashioned Washington pie so ancient recipe is, "Take anything left over, sweeten it and bake." There seems to be quite a demand for this product now.

MOST of the gangs of bad boys and men that the cities develop would be useful citizens if given something useful to do in their earlier years. Here is the place where vocational training would help.

MAGNATES who have taken steps to discourage letting on baseball games show wisdom. Any time they desire an object lesson as to the blessedness of betting let them note what happened to horse racing.

GOV. SUTHER says that politics was in part responsible for the Birmingham fire factor. About how soon are the American people going to grow tired of the kind of politics that traps and burns to death throngs of girls whose only offense is that they work for a living.

TRANSATLANTIC wireless communication from Sayville, Long Island, to Berlin, Germany, has just been established by the German Telefunken System. Messages sent from Sayville on July 12th were clearly received at the Nauen station near Berlin, spanning a distance of 4,000 miles.

HORRIBLE secrets of the kitchen take the St. Louis waiters. After reading about the "come backs" said to be served guests in certain fashionable eating places, one is tempted to become a food reformer and live on raw fruits and nuts. But, of course one can always get married.

NATURAL, the jackal that betrays the lesser animals to the tiger will betray the tiger to the hunter when occasion offers. The tiger is foolish to expect loyalty where he buys treason. Oh, nothing! We merely were wondering why Wall Street and the N. A. M. choose to be indignant at Lamar and Mulhall.

THAT suggestion to have the bones of Columbus conveyed through the Panama canal as a part of the ceremonial of opening is silly dangerous and impracticable. About seventeen towns and cities claim to have the bones of Columbus, and they would fight over the authenticity of their relics. Let the bone head of the suggester suffice.

It is a queer world, as the serpent reminded Eve. Those bally Londoners are agitating for the "privilege" of crowding cars as much as they bloom in well like, and hangin' on the bloody strap, if they jolly well want to! It is awfully hard to distinguish between a model and a horrible example, isn't it?

MARYLAND is famous for the quality of its chickens and the skill of its cooks and Washington should be a gastronomical and culinary heir of Maryland, yet Senator Tillman says that the Washington chicken is abominable. If the cold storage fowl has invaded the capital we may hope to have some action taken to protect the consumer who is under the aegis of the senatorial appetite.

PERKING the year 1912, 20,275,120 tons of shipping passed through the Suez Canal, an increase of nearly 2,000,000 tons over the year of 1911. The total receipts of \$27,300,000 were the greatest in the history of the canal. During the year 5,373 ships passed through the canal, and of these 3,335 flew the British flag. Such figures as these give ground for the hope that the Panama Canal may become self-

supporting and even profitable sooner than some of our statisticians have predicted.

if we bear in mind the many difficult problems and the great cost involved in changing from steam to electric operation on railroads, it must be admitted that this country has made great strides in this direction. A recent estimate of single track that has been changed from steam to electric operation at about 1,600 miles, and the same authority finds that approximately 1,500 miles of single railroad will probably during the next few years, be subjected to the same change. Too much credit cannot be given to the New York Central and the New Haven railroads for the courageous pioneer work which they undertook in this direction.

AN electrical research laboratory and bureau is to be established at the Massachusetts Institute of Technology. In connection with the laboratory there is to be a new electrical library, for which an endowment of over \$100,000 is assured. Dr. Harold Pender will be the director of the laboratory with H. E. Thompson as his secretary and assistant. The new laboratory has received an endowment of \$10,000 a year for five years from the American Telephone and Telegraph Company, and \$5,000 a year for five years from an anonymous donor, the latter to be used in determining the distance to which a street car passenger can, with reasonable profit, be carried for a five cent fare. The laboratory has also received a gift of \$2,000 from the Boston & Maine and the New York, New Haven & Hartford Railroad, for the study of freight handling at terminals. About a year ago the American Telephone and Telegraph Company gave the institute the Dering electrical library of 30,000 titles valued at \$100,000. To maintain the library the company has assured to the institute the sum of \$5,000 a year.

We want the name of every young man who is ambitious to BE A LAWYER

and we want to hear from every business man who wishes that he knew BUSINESS LAW. Write today and let us tell you how we have made lawyers out of hundreds of young men just like you, and equipped business men with a legal training that has been a financial benefit to them. THE STRANGE CORRESPONDENCE SCHOOL OF LAW 601 American Building, Detroit, Mich.

LEST YOU FORGET!

Polls Open from 6 a. m. to 4 p. m., on Saturday, August 2nd, 1913

Lest You Forget

You will have an opportunity to select candidates as nominees for the County offices.

I am a candidate for County Court Clerk. My name will appear first under the heading of County Court Clerk. I have every assurance I will win. If you will give me your vote and influence I am certain to win. Help me, now!

Even my political opponents admit I will be elected, if nominated.

Now is the time to help me. Cast your vote for me and I will so conduct the office you will never regret voting for me.

I want everybody's vote, and I am not above asking for it.

I appeal especially to my Brother Card holders. I have been a member of Organized Labor since I was a boy and I carry a Printers' Union card to-day. Carried a United Mine Workers Card in former years. I am the only Card man aspiring to an office in the courthouse, and if nominated and elected I will be the first representative of Organized Labor that ever held a courthouse office in Muhlenberg county since its formation--over 100 years ago. I know I will get the votes of my Brother Printers and I hope and ask for the votes of the Miners and other brothers of Organized Labor.

NOW, August 2d, is the time to help. Vote for me and lend me your help.

Thanking you, one and all, in advance for your help and vote, I am, yours

Lest You Forget

BETHEL COLLEGE

For Boys and Young Men Established 1854

Standard preparatory and college courses leading to literary and scientific degrees. Well equipped business department. Strong faculty. Healthful and moral surroundings. No saloons. Campus of thirty acres; four large buildings. Athletic park and gymnasium. Steam heat. New and complete sanitary system. Boarding department superintended by President. Tuition and board at moderate cost. Address for catalogue:

H. G. BROWNELL, President, or W. E. FARRAR, Dean.
BETHEL COLLEGE, KENTUCKY

The Domestic Science Stove

THE recreation hours oftentimes teach valuable lessons. It is during these hours that things are done the easiest way, and thus you learn many labor saving methods good for every day use.

The electric grill not only adds ease to the fun of making fudge or cosiness to the impromptu luncheon, but it also teaches the most important lesson in domestic science--how to cook in the easiest, cleanest and least expensive way.

Anything you wish can be quickly cooked by it. You can grill, boil, fry, toast, stew and bake griddle cakes--all on the dining room table or on the little table in your own boudoir.

Local Mention.

Rural schools will soon be started.

Look out for mad-dog scares; they are due now.

Farmers are extremely busy dodging candidates.

Blackberries are gone, but the watermelons are on.

Street auctioneers did a thriving business here Monday.

The last month of summer is ready to enter.

Lest you forget: the Democratic primary Saturday.

Several persons are having their coal houses filled.

Miss Hettie Newton, of Morgantown, is visiting Miss Nina Stum.

Garden truck is getting scarce, and the price is correspondingly high.

Orien L. Roark was in Louisville a few days the latter part of the week.

Mr. Thos. Sumner was in Bowling Green on business affairs this week.

Mr. W. A. Wickliffe was in New York on business several days during the week.

Mr. J. W. Lam returned the first of the week from a business visit to West Virginia.

The good roads interest grows, and may really develop into some work, in time.

Miss Mary Hayes has returned from a visit to Cleaton and Diamond Springs.

Mrs. Robert Hardison and children returned Friday from a visit to relatives in Lewisburg.

The LaMeade opera house is now running moving pictures, showing nightly the very best films.

The frost will find very few victims if the fly war keeps on as it has been waged since early spring.

Canvassing has become a night-and-day job now, and there will be no let-up until the primary closes Saturday.

See Roark for window shades, wallpaper, mouldings etc.

Flies have become so scarce and cunning that it requires acute generalship to accomplish a swatting.

Hear Dr. Heizer at the court house tonight, as his lecture will be one of the important features of institute week.

The automobile fever is not subsiding to any perceptible degree, and agents have many live prospects in the list.

It is now easier to get hauling done, as farmers are through with their rush work, and have gone into public service.

Mr. Otto A. Rotherth, of Louisville, arrived Tuesday, and will spend a short time with his Muhlenberg county friends and admirers.

That school fair is getting plenty of publicity this week, and the event this year will show a lusty growth over the first one, held last fall.

Lost—A 2 fold black purse on Main street, Hopkinsville street Monday, Aug. 28; contained sum in currency. Suitable reward for return to this office.

A man who has a bargain-hunting wife says that a bargain is something which you don't need, but can buy awful cheap with money you owe somebody.

That was the largest county court crowd in town Monday that we have had in many months, every merchant was busy all day, and everyone was in good humor.

The war on the fly goes merrily but doggedly on, and since man has realized that he must kill the fly, or the fly will kill him, there is hope that the fly will yet become extinct.

Mayor W. O. Head has been here from Louisville several days, in the interest of his brother, Mr. G. B. Head, who is making an active canvass for the Democratic nomination for Sheriff.

Prof. T. J. Coates is mixing business and pleasure here this week, instructing the teachers as director of the institute and mingling with his many friends here and over the county.

Stop, Look, Listen!

See that magnificent new mill at the depot; nothing that equals it in the state. Have you used the Quail meal and Bob White flour they make? If not, patronize home industry and get the best. Home Milling Co. Incorporated.

Stock water is getting very scarce all over the county, and old wells and springs are being looked up and cleaned out, and every means being employed to supply the deficiency. Some farmers are having to haul water.

The Louisville Times last Saturday had Mr. Otto A. Rotherth on the "Who's Who" roll of honor, and made pleasing reference to his literary activities, and especially on his History of Muhlenberg County, just from the press.

Candidates had a rich opportunity here Monday, people from all sections being here in vast numbers and there were few neglected voters, all of them receiving the attentions and solicitation of the men who are seeking party preferment.

County Teachers' Institute

Muhlenberg county school teachers are here this week, at work and play; the annual institute is in session at the court house, convening Monday, and the last session will be held tomorrow. Prof. T. J. Coates is again the instructor, and a more happy selection could not have been made, as the state has no more forceful, active man in the educational work than Prof. Coates. He is especially loved and appreciated here, where he spent many years in the school room, and his hosts of friends and admirers are always glad to welcome him socially and professionally. His talks have all been highly interesting, and his lecture "Americanism," delivered Tuesday night, was a masterly, practical talk enjoyed by a large audience. The programs have been varied enlisting the efforts of many of the teachers, and all have been benefited by the communications of the week.

Chickens and turkeys have been dying in large numbers throughout Kentucky and Indiana from a new disease that has not been brought under control. Fowls wander away and die, other fowls find and eat them, thus causing a vast decrease in the poultry supply, as limberneck develops from the eating of the dead fowls.

1914 Ford Cars \$500 and \$550.

Effective August 1 the price on Ford cars will be \$500 for the runabout and \$550 for the touring car, F. O. B. factory at Detroit. The cars have been strengthened and refined, at the same time materially reduced in price. Messrs. Irvin & Gilman, local agents, will be in position to make deliveries in reasonable time.

Mrs. J. T. Hale, who has been sick for some time, suffering from a complication of troubles, was reported as resting easier yesterday.

A Fly Catechism.

The following questions and answers were prepared by the Indiana State Board of Health and have been widely copied:

1. Where is the fly born? In manure and filth.
2. Where does the fly live? In every kind of filth.
3. Is anything too filthy for the fly to eat? No.
4. (a) Where does he go when he leaves the surface closet and the manure pile and the spittoon? Into the kitchen and dining room. (b) What does he do there? He walks on the bread fruit and vegetables. He wipes his feet on the butter and bathes in the milk.
5. Does the fly visit the patient sick with typhoid fever, consumption and cholera infantum? He does—and he may call on you next.
6. Is the fly dangerous? He is man's worst pest and more dangerous than wild beasts or rattlesnakes.
7. What diseases does the fly carry? He carries typhoid fever, consumption and summer complaint. How? On his wings and hairy feet. What is his correct name? Typhoid fly.
8. Did he ever kill anyone? He killed more American soldiers in the Spanish American War than did the bullets of the Spaniards.
9. Where are the greatest number of cases of typhoid fever, consumption and summer complaint? Where there are the most flies.
10. Where the most flies? Where there is the most filth.
11. Why should we kill the fly? Because he may kill us.
12. When shall we kill the fly? Kill him before he gets wings—kill him when he is a maggot in the manure pile—kill him while he is in the egg state.
13. How? Keep the stables dry and clean and don't allow any manure to stay on the premises longer than one week. Have all other filth and trash accumulating on your premises removed or burned at least once a week.
14. If your neighbor fails to comply with these rules and allows flies to breed on his premises to visit you, screen your doors and keep them out.

Porch and lawn furniture, cots, summer comforts, at Roark's. Many visitors from town and elsewhere have been attending the sessions of the institute this week, and enjoying the excellent work of Prof. T. J. Coates, the instructor, and the teachers.

Old Hickory, the most comfortable chair in the world, at Roark's.

Dr. W. L. Heizer Lectures Tonight.

Dr. W. L. Heizer, of the bureau of vital statistics, will deliver an illustrated lecture at the court house tonight, to which everyone is invited. Admission will be free, and it is urged that a full attendance be given, as Doctor Heizer has been very closely connected with the health conditions of the state for many years, is an able man and will have many important matters to present to our people.

Miss Lena Arnold asks the patronage of the public, and guarantees that satisfactory work will be done in her clothes cleaning, pressing and repairing shop.

THE RECORD 50c per year.

Negro Assailant Arrested

Clifton Pennington, a negro man, was arrested in St. Charles and brought here last Saturday, held in jail on the charge of having entered the home of Mr. Walter Bandy, south of town, on July 17, and offered violence to Mrs. Bandy, being scared away by her screams. Diligent search was made for the negro at the time but the assailant escaped. Accurate description was secured by the officers, and sent to officials far and near. An examining trial was held Tuesday. Pennington was placed in a room with four other negroes, and Mrs. Bandy identified him as the man who had attacked her. Pennington claims he lives in Hopkinsville, does not deny that he was in this vicinity about that time, but declares that is innocent of the charge. He tells conflicting stories, and while the evidence against him has not been divulged, it is understood that the case will be made strong against him. Acting Judge W. C. Jonson, after hearing the evidence, held Pennington over to the September grand jury under a \$5,000 bond, failing to give which, Pennington is in jail. The case attracted much attention, but there was no excitement or undue passion manifested.

Look, Look!

Weigh your wheat and bring it to us, and for every bushel of No. 2 we will give you 40 pounds of the famous Bob White flour the best on the market.

Mastication.

When we do not chew our food properly the civil consequences are many, and often serious in their effect upon health, and even life. In the first place, a person who does not chew his food sufficiently is sure to eat too much. That is especially true in the case of soft foods, which are sometimes literally shoveled into the stomach. Food that needs mastication will generally get a little, even from the worst sinner, although sometimes it gets only enough to make the act of swallowing possible.

Through mastication acts in two ways to diminish the amount of food you take. If a proper proportion of the time spent at the table is occupied by the work of mastication, the amount of food taken is naturally less. Furthermore, those who chew properly do not crave food as others do, for they digest what they swallow, and are free from the unnatural hunger that torments the rapid eater. Mr. Fletcher, the dietitian, has proved that he can maintain a high degree of health and vigor on a much smaller amount of food than most people think they need. Another real danger to the health of the rapid eater arises from the unbroken lumps of food that pass into his stomach. In some cases the digestive juice struggles with them in vain, and they cause much discomfort, and often serious disorders—often appendicitis.

Children should be taught to chew their food well, for the healthy condition of the mouth and teeth in after life depends upon their doing so. If the jaw does not grow properly, there is not room enough for the teeth. Now, the growth of the jaw depends in a large measure on the mastication it is called upon to do. The teeth themselves suffer also—they miss the active circulation of the blood, the stimulation of the gums, and the cleansing of the mouth by the salivary glands that follow upon the act of chewing.

Listen, Listen!

What is that sound I hear, is it an earthquake? No it is just the roar and rumble of the machinery that is making the famous Bob White flour, the best on earth. Try it.

The health board of Hopkinsville will administer 2,000 doses of anti typhoid serum free, beginning August 4, the work being continued for six weeks, if necessary. This system of preventive medicine has become quite popular, the splendid results of the army and navy treatments having proven highly efficient, and hundreds of thousands of people all over the country have taken the treatment.

Mrs. Laura Martin, widow of Mr. Harry Martin, died at her home in Bonham, Texas, last Sunday night, after an illness of some weeks from stomach trouble. Deceased was well known here, where she has many relatives and friends.

If you have wheat or corn to grind we can give you a big turn-out in 15 minutes after you drive up to our mill door. Try us and we will please you.

FRAIL, SICKLY CHILD

Restored to Health by Vinol—Letter to Mothers.

Anxious mothers often wonder why their children are so pale, thin and nervous and have so little appetite. For the benefit of such mothers in this vicinity we publish the following letter.

J. Edmund Miller, New Haven, Conn., says: "My little daughter, ever since her birth, had been frail and sickly, and was a constant source of worry. Several months ago we commenced to give her Vinol. I immediately noted an improvement in her health and appearance. I gave her three bottles of Vinol, and from the good it has done her I can truly say it will do all you claim."

This child's recovery was due to the combined action of the medicinal elements extracted from cods' livers, combined with the blood-making and strength-creating properties of tonic iron, which are contained in Vinol.

Vinol will build up and strengthen delicate children, old people and the weak, run-down and debilitated. We return the money in every case where it fails.

G. E. COUNTZLER, Druggist.

NOTES FROM MEADOWBROOK FARM
By William Pitt

Named your farm yet?
Clover is a cleansing crop.
Get sunlight into the dairy barn.
Grain raising depletes fertility of the soil.
Never throw wet feed on the ground.
Strawure makes a good material for filling the silo.
Dairy cattle cause much richness among the calves.
If you want your cows to do well make them comfortable.
Bright clover or alfalfa hay should be kept in a convenient rack.
Remember that the entire family are not protected by furry coats.
It is generally estimated that broilers shrink one-half pound each when dressed.
Are the prices of rabbits falling the trees? Remove rabbit and wrap the trunk in paper.
Get your spraying equipment in good order several days before you must begin spraying.
The cherry separator should be firmly fixed on a solid base if good work is expected of it.
The average yearly butter fat production per cow in the United States in 1900 was 145 pounds.
Salt the hogs as often as you do the other stock. They will be healthier and digest their food better.
It is almost impossible to crowd the young pigs too fast, provided you have the right kind of food and care.
Some people have gone so far as to claim that the corn stalks in the silo are worth as much as the ears in the crib.
Wash and dry the cows before milking and keep 21 per cent. of the dirt out of the milk that usually gets in otherwise.
The garden should be well fertilized in the fall or winter. This makes it possible to work it more quickly when spring comes.
The dairy farmer ought to have pigs for market every year. This is the best way to sell the by-products at the top price.
One reason why pure bred steers are so necessary on the farm is because defects are just as easily transmitted as good points.
The heifer that is to be retained in the herd should be handled from her early calfhood so that she will have confidence in her keeper.
It is well to order a few catalogues from the reliable seed and nursery companies. They are educators even if we are not intending to buy.
See that the hogs have all the pure water they can drink at all times. If you have slush milk to spare, that also can be placed before them constantly.
Keeping any machine well oiled and in proper repair not only increases efficiency, but decreases the amount of power required to run the machine.
The milk pail is always more nearly full when pasture is at its prime than during any other season, and the silo will produce the same conditions in the winter.
The manure spreader and systematic crop rotation form the two strongest links in the chain for the maintenance of soil fertility and heavy crop production.
The ideal cow! Everybody's looking for her, but few find her, though she is the most valuable asset on the farm. How many possible ideal cows are done into real in this country every year nobody knows.
Too much care cannot be exercised by breeders in sending out eggs for hatching. A good way is to wrap each egg in paper separately and place them in a basket, doubly lined with newspaper and packed with excelsior.
For poultry food, pea meal will be found nutritious, rice easily digested, flaked meal cathartic, potato starch digestible, barley nutritious but inactive, and oatmeal more nutritious than either wheat or barley. There is fully 55 per cent. of fat in oatmeal. Corn contains from 7 to 8 per cent of yellow fat.

Never feed dusty feed.
The poultry industry is growing.
Green feed for hogs is essential.
Conquer the kicking cow with kindness.
Put the silo on the warm side of the barn.
A little frost will not hurt cauliflower.
Lack of exercise is excellent to make fowls sick.
Silage fed cows are never attacked by the cornstalk disease.
An occasional scolding in brief will keep the warden calm sweet.
An ordinary cow yields about 30 tons of liquid and solid manure a year.
The man with four or more cows doesn't save money by not buying a separator.
Plenty of sunlight in the calf stable makes for health and quick growth in the youngsters.
The dairyman who has alfalfa hay to feed needs less grain than the man feeding other hays.
A postcard is a pullet deprived of the power of producing eggs, with the object of great size.
Avoid the mistakes made last spring, and make good use of the things learned last year.
Other things being equal, the separator on a solid and level foundation will give the longest service.
There is no animal that responds more quickly or more profitably to good treatment than the pig.
Cherry trees are entirely free from diseases, on which account nurserymen like to handle them most.
A simple system of bookkeeping maintained throughout the year will be both helpful and satisfying.
Throwing manure out of the stable against the posts of the basement will surely cause them to rot. Don't do it.
The male chicken is a cock, the male goose a gander, the male duck a drake, and the male turkey a tom or gobbler.

There should be enough ventilation in every hen house to do away with the dampness caused by the fowls' breathing.
Every farmer with a number of cows should have a clean, sanitary milk house, well supplied with good cold water.
When hay contains quantities of grass and other food seed the composting of the manure is a necessary precaution.
Corn is the best crop to plant on new land, as the constant working will put the ground in good order for seeding in the fall.
Save all the small potatoes to use with the mixed food later on. They will prove a very beneficial addition to the warm mash.
The best profits in dairying come from the best farms and herd. It takes more than a good creamery to make a large milk check.
All the growth and thrift that can be encouraged and maintained during the first year of a calf's life insure a stronger and a better horse.
If the incubator is to be used in hatching chicks, look it over and see that everything about it is in proper shape before starting the heat.
Are there not some places about the farm where evergreens ought to be planted? They make a splendid windbreak about the barn and yards.
Before rattling a hen it is well to thoroughly clean the nest and then lay a piece of cardboard, soaked in kerosene in the bottom of the nest.
The kind of separator one uses is of less importance than the kind of care given the machine. It is of course taken for granted that you have an efficient skimmer.
Boston now claims to possess a real Venus. With beauty and brains cornered, the slaid center of intellect and culture will soon challenge Paris for the style championship.
Teach the boy that there is just as much opportunity to use his brains on the farm as in any other work and the chances are he will be more willing to stay with you.
Present indications are that hog prices will make another flight within the next five or six months. This ought to be a good time to get a bunch of shoats together and feed them skim-milk.
While plenty of roughness of the ordinary kind does not add much richness to the ration in theory, in practice it is worth considerable. Cows like the stuff themselves with something after having had their need of concentrated feed. If they cannot do this they fall down in the milking supply.
